PROGRAMMING LANGUAGES & DATABASE PROFICIENCY

Expertise	Visual Studio code, MongoDB Compass
Programming Languages	React js, JavaScript, Node js
Operating Systems	Windows, Mac
Web Technology	JavaScript, ES-6, React js, Redux, Node js, Express js, Typescript, Socket.io, HTML, CSS, Bootstrap
Database Systems	Mongo db
Other Knowledge	Github
Concepts	OOPS, React hooks, Context API's, JSX, ES-6, Lifecycle Methods, React router, State management, Virtual DOM, Performance Opt.,

EDUCATION

Course	Board/University	Year of Passing	Percentage/CGPA
MCA	Singhania University	Pursuing	-
BCA	UOK	2021	7.9 CGPA
H.S.C	Rajasthan Board	2018	61.60%
S.S.C	Rajasthan Board	2016	66.50 %

PROJECTS

Name: Intelligent CRM

Project Description: The Intelligent CRM is utilized by a large hotel giant for setting competitive prices. It has Admin and Client side portal.

The **Admin Portal** of the Intelligent CRM is the central control hub for the hotel management system. It provides privileged access to administrators, allowing them to oversee and manage various aspects of CRM.

Key functionality include:

Client Management, Price Management, Contract and Partnership Management, Analytics and Reporting, Configuration Settings.

The **Client Portal** is the interface through which other authorized users interact with the Intelligent CRM. It is designed for user-friendly access to relevant features and information.

Key functionality include:

Booking and Reservation Management, Lead and Opportunity Tracking, Communication Tools, Account and Contact Management, Subscription Management

Core features include:

- Hotel management structured around products for sale based on subscription models.
- Management of various entities such as Activity, Lead, Suspect, Account, Contacts, Opportunities.
- Processes tailored for hotel management, including the ability to establish tie-ups or contracts with other companies for management in different countries.

Tools/Technologies: Postman, Swagger, React js, Redux, Typescript, .Net

Name: OMS(Office management System)

Project Description: OMS is a comprehensive system designed to streamline and enhance office management processes.

Core features include:

- Employee Management: Track and manage employee information, attendance, and performance.
- Task and Project Management: Facilitate the organization of tasks, projects, and deadlines for efficient project completion.
- Document Management: System for organizing, storing, and retrieving documents efficiently.
- Security and Access Control: Implement security measures and access controls to protect sensitive information.

Tools/Technologies: Postman, Swagger, Visual Studio Code, React js, Redux, .Net

Name: Chat App

Project Description: "Chat App" is a dynamic and feature-rich chat application designed for seamless communication. With a focus on simplicity and effectiveness, it provides users with a modern chatting experience.

Core features include: Real-Time Messaging, User Authentication, One to One & Group Chats, Notifications, Message History

Tools/Technologies: React js, Context Api, Node js, Express js, Mongodb, Socket.io, Postman, Visual Studio Code
